01

Pre-drilled holes in the base and top panel

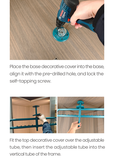

Please note that the cabinet installation size, this product is suitable for cabinet length and width=300mm; height 1800-2000mm.

Measure and mark the center points of both the length and width of the cabinet.

Draw vertical lines from the center points on both sides to confirm the center point of installation.

Measure the diameter of the base seat of the clothes rack,take the installation center point as the center of the circle, take three points with the radius of the base seat, and draw the installation position of the base seat of the clothes rack.

Pre-drilling,after the base panel is aligned with the installation position , pre-drill the holes for the screw holes and erase the traces of the drawing lines after the pre-drilling is completed.

Similarly, pre-drill the top of the cabinet for the top seat of the clothing rack.

02

Installation of clothing rack swivel frame

Take apart the base of the clothes rack, then pre-install the screws.

Place the base decorative cover into the base, align it with the pre-drilled hole, and lock the self-tapping screw.

Fit the top decorative cover over the adjustable tube, then insert the adjustable tube into the vertical tube of the frame.

Align the bottom of the frame with the holes of the rotating part, then tighten it with two screws.

Fasten the bottom decorative cover and the bottom of the clothing rack is installed.

Align the adjustable tube and the top decorative cover with the pre-drilled holes,then tighten the self-tapping screws.

The installation of the rotating frame is completed.

03

Installation of the accessories

Align the shelf basket with the holes at the bottom of the frame, then tighten the screws (left/right).

Align shelf basket edge to press the decorative cover down into place (left/right).

The shelf basket is installed.

Hang the clothes hanger on the central crossbar of the frame, and the installation of the O-shaped corner clothes rack is completed.
